

Our services for virtual exhibitions

(already included in the offer)

- Creatives for concepts and **technical advisory**
- Creation of one **photorealistic room** as showroom or exhibition stand
- All Renderings will be created as **360 degree panoramic photos** with a resolution of 8000x4000 Pixels
- Combining the panoramic photos to create a **virtual tour**
- **CI-compliant design**
- Virtual tour works with **any VR-Device** (with automatic detection)
- Embedding your **floor plan** with options to jump to certain panoramic photos or hotspots
- **Embedding your logo** and linking it to your website (Tours can be found on search engines like google so linking to your website is recommended)
- Tour as **Responsive Design** – optimized for all devices: Smartphone, Tablet, Desktop and VR
- **Cross-platform** compatible – HTML5 instead of proprietary flash technology
- **Quick loading times** due to Multi-Resolution-Techniques
- **Statistics via Google Analytics** – detailed information about selected panoramic photos, clicks on hotspots, info points etc.
- **Detailed presentation of your exhibits** as info box with image and text or even as photo gallery
- Embedding **videos of your product** inclusive text description (can be run automatically as video starts)
- **User Downloads** – PDF, Media/Images, CAD
- **Linking to the product page**
- **Option to host the tour on our server**
- **Manage the content yourself** without the need of extra software

Additional services we offer

- **3D visualization** of your product/exhibit
- **Motion animation** of your 3D visualizations
- Embedding of **audio comments** for your products
- **Advanced details of your exhibits** (for example a panoramic view of the inside of your product)
- **Live Chat** function i.e. with Userlike Chat Widget
- Embedding of a **live video/audio guided tour**
- Integration of a **quiz function** with a competitive point system
- **Option to expand your showroom/exhibition at any time**
- Automatic transition **between two panoramic photos in one view** (for example day/night, light on/off or exhibit with advanced functions on/off)
- Creating a **video tour for YouTube** and other social media platforms
- **Offline version of the entire tour** – can be used to present the tour right on the exhibition via screen or VR-Devices
